

**Quality household products  
since 1981**

Crafting Excellence, Preserving the Future

Filplast is committed to optimizing resources and  
limiting the impact of its products on the environment

**[www.filplast.it](http://www.filplast.it)**

  **Azienda**

**FILPLAST** si costituisce il 15/10/1981 con lo scopo di produrre articoli in filo ferro plastificato dedicati all'uso domestico. Dopo 40 anni dalla fondazione lo scopo ed i principi cardine sono rimasti gli stessi: essere il fabbricante europeo di riferimento di articoli per la casa. Il nostro processo produttivo si ispira a principi di estrema attualità, quali:

- minimizzazione dell'impatto ambientale mediante una progettazione attenta a tutte le fasi del ciclo di vita del prodotto
- ideazione responsabile
- uso di materie prime riciclate
- imballaggi rispettosi dell'ambiente
- consumi di energia attentamente monitorati e minimizzati
- sicurezza
- durata
- uso intuitivo

 **Company**

**FILPLAST** was founded on 15 October 1981 with the aim of producing plasticized iron wire products for domestic use. 40 years later, the aim and the key principles have remained the same: to be the reference manufacturer of household items in Europe. Our production process is inspired by extremely innovative principles, such as:

- minimization of environmental impact, through careful design, at all stages of the product life cycle
- responsible ideation
- use of recycled raw materials
- eco-friendly packaging
- carefully monitored and minimized energy consumption
- safety
- duration
- intuitive use

  **Enterprise**

**FILPLAST** a été créée le 15/10/1981 dans le but de produire des articles en fil de fer plastifié destinés à un usage domestique. 40 ans après sa création, l'objectif et les principes clés sont restés les mêmes : être le fabricant européen de référence en matière d'articles ménagers. Notre processus de production s'inspire de principes extrêmement actuels, tels que:

- minimisation de l'impact environnemental grâce à une conception soignée à toutes les étapes du cycle de vie du produit.
- conception responsable
- utilisation de matières premières recyclées
- emballage respectueux de l'environnement
- consommation d'énergie soigneusement surveillée et minimisée
- sécurité
- durée
- utilisation intuitive

## Qualità

La nostra dedizione allo sviluppo di prodotti di alta qualità è testimoniata dalle nostre certificazioni ISO 9001 e 14001. Ci impegniamo costantemente a creare prodotti impeccabili che rispondano alle esigenze dei nostri clienti, garantendo standard qualitativi elevati e sostenibili in ogni fase del processo produttivo. La certificazione ISO 9001 attesta il nostro impegno per l'eccellenza nel controllo della qualità, mentre la certificazione ISO 14001 riflette il nostro impegno verso la sostenibilità ambientale, dimostrando la nostra responsabilità nel ridurre l'impatto sull'ambiente.

## Quality

Our dedication to crafting high-quality products is evidenced by our ISO 9001 and 14001 certifications. We consistently strive to create impeccable products that meet our customers' needs, ensuring high and sustainable quality standards at every stage of the production process. The ISO 9001 certification attests to our commitment to excellence in quality control, while the ISO 14001 certification reflects our commitment to environmental sustainability, showcasing our responsibility in reducing our environmental impact.

## Qualité

Notre dévouement à la création de produits de haute qualité est attesté par nos certifications ISO 9001 et 14001. Nous nous efforçons constamment de concevoir des produits impeccables répondant aux besoins de nos clients, garantissant des normes de qualité élevées et durables à chaque étape du processus de production. La certification ISO 9001 atteste notre engagement envers l'excellence dans le contrôle qualité, tandis que la certification ISO 14001 reflète notre engagement en faveur de la durabilité environnementale, démontrant notre responsabilité dans la réduction de notre impact sur l'environnement.

## Ambiente

La salvaguardia del mondo in cui viviamo riguarda la nostra vita e quella delle generazioni che verranno. Ecco come Filplast si impegna a ottimizzare le risorse ed a limitare il suo impatto sull'ambiente.

- Prodotti realizzati con particolare attenzione alla selezione, di materie prime riciclate.
- Stendibiancheria pensati per offrire la massima funzionalità e robustezza. Garantiamo ogni articolo per un minimo di 2 anni.

L'attività di trasformazione delle materie prime inizia da materiali ferrosi che, grazie ad innovative macchine automatiche, realizzate su misura delle specifiche esigenze aziendali, sono poi trasformate mediante processi di sagomatura e saldatura.

La struttura produttiva è totalmente concepita secondo criteri di flessibilità, che consentono di mantenere il giusto equilibrio tra l'ottimizzazione dei costi produttivi ed il rispetto delle esigenze dei clienti.

Grazie alla nostra infrastruttura, siamo capaci di assistervi nel complesso mondo della Grande Distribuzione Organizzata. Ogni anno produciamo ed immettiamo sul mercato fino a 6 milioni di articoli.

## Environment

Safeguarding the world we live in concerns our lives and that of generations to come.

This is how Filplast is committed to optimizing resources and limiting its impact on the environment.

- Products made with particular attention in selecting recycled raw materials
- Drying racks designed to offer maximum functionality and sturdiness. We guarantee each item for a minimum of 2 years.

The transformation activity of raw materials begins with ferrous materials which are then transformed through shaping and welding processes, thanks to innovative automatic machines, tailor-made to specific company needs.

The production building is totally designed according to flexibility criteria, which allow maintaining the right balance between the optimization of production costs and compliance with customer needs.

Thanks to our infrastructure, we are able to assist you in the complex world of large-scale distribution. Every year we produce and place on the market up to 6 million items.

## Environnement

La sauvegarde du monde dans lequel nous vivons concerne notre vie et celle des générations à venir.

C'est ainsi que Filplast s'engage à optimiser les ressources et à limiter son impact sur l'environnement.

- Produits fabriqués avec une attention particulière à la sélection de matières premières recyclées.
- Étendoirs à vêtements conçus pour offrir un maximum de fonctionnalité et de robustesse. Nous garantissons chaque article pendant 2 ans minimum.

L'activité de transformation des matières premières commence par les matériaux ferreux qui, grâce à des machines automatiques innovantes, adaptées aux besoins spécifiques de l'entreprise, sont ensuite transformés à travers des procédés de façonnage et de soudage.

La structure de production est entièrement conçue selon des critères de flexibilité, qui permettent de maintenir le juste équilibre entre l'optimisation des coûts de production et le respect des besoins du client.

Grâce à notre infrastructure, nous sommes en mesure de vous accompagner dans le monde complexe de la grande distribution. Chaque année, nous produisons et mettons sur le marché jusqu'à 6 millions d'articles.
